DETAILED CERTAIN PARTS OF THE WORLD (MAY)

What did we learn?	Impacts	Consequences	Adaptation	Resilience
Climate change is a global threat	Increased temperatures	Increased sea levels	Increased extreme weather	Increased biodiversity
Human activities are contributing to climate change	Increased greenhouse gas emissions	Increased deforestation	Increased land use changes	Increased urbanization
Climate change is affecting ecosystems and biodiversity	Increased extinction rates	Increased habitat loss	Increased species migration	Increased ecosystem degradation
Climate change is affecting human health and well-being	Increased heat stress	Increased air pollution	Increased water scarcity	Increased food insecurity
Climate change is affecting the economy and society	Increased economic losses	Increased social inequality	Increased displacement	Increased conflict

Timeline diagram showing the study design. The timeline starts at 0 and ends at 12 months. At 0, there is a baseline assessment. At 3 months, there is an assessment. At 6 months, there is an assessment. At 9 months, there is an assessment. At 12 months, there is an assessment. The timeline is divided into three 3-month periods. The first period is labeled 'Baseline'. The second period is labeled 'Intervention'. The third period is labeled 'Follow-up'.
